2024 Retail Sales Yard Price List

- *All listings are alphabetical by common name*
- *If you are looking for something you do not see, please contact us for a quote*
- *This list is just a general retail price guide of the items we intend to carry for the 2024 season and does not guarantee items are in stock.*
- *To see current availability, please visit our website, or give us a call.*
- *For wholesale inquiries, please email Aleah at awilliams@wwnursery.com*
- **Items marked with an asterisk (*) are premium grade items and may be priced higher than similar items of the same size.**

The following are species of plants whose sales are regulated by the NYS DEC:

- Norway Maple (*Acer platanoides*)
- Dwarf Burning Bush (*Euonymus alatus compactus*)
- Maiden Grass/Chinese Silver Grass (*Miscanthus sinensis*)
- Winter Creeper (*Euonymus fortunei*)

Cultivars of these species are marked with a label that states
"Invasive Species; Harmful to the Environment"
and offer suggestions for possible substitutes and care guides for responsible handling. To see what is defined as an invasive species as well as a full list of prohibited and regulated plants, visit the website for the NYS DEC.

There are currently two varieties of sterile barberry that are allowed to be sold in NYS. Normally barberry are a prohibited plant but selective breeding and rigorous testing has led to the development of some cultivars that are sterile. The two cultivars we carry at the garden center are:
'Crimson Cutie' and 'Lemon Glow'

ALASKAN CEDAR - *Chamaecyparis nootkatensis*

Weeping Alaskan Cedar	4-5'	\$ 259.99

IT IS NOT RECOMMENDED TO PLANT RED, GOLD, OR PURPLE RASPBERRIES WITHIN 100 FEET OF BLACK RASPBERRIES.

BLACK RASPBERRIES ARE MORE SUSCEPTIBLE TO VIRAL DISEASES CARRIED BY APHIDS FROM OTHER RASPBERRY PLANT TYPES.

MOST APPLES, PEARS, PLUMS AND SWEET CHERRY, AND SOME OTHER FRUITS NEED A COMPATIBLE POLLINATOR IN ORDER TO SET FRUIT.

WE HAVE A COMPLETE APPLE POLLINATION CHART AT THE GARDEN CENTER AND CAN ADVISE ON WHAT VARIETIES WILL SUCCESSFULLY CROSS-POLLINATE FOR OTHER FRUITS.

HAVE QUESTIONS ON PRUNING, STAKING, PLANTING, PEST & DISEASE MAINTENANCE?

COME VISIT OUR INFO CENTER TO LEARN HOW TO PROPERLY MAINTAIN YOUR HOME ORCHARD!

ANNUALS

(Mixed 10" hanging baskets, flats, 4" pots and container gardens priced at nursery.)

2024 Perennial Prices:

#1	\$	14.99
#2	\$	18.99
#3	\$	26.99

While we aim to keep perennials & grasses at their base cost per container size, some may be priced higher - either from limited availability or because they are harder to grow.

CUSTOM STARTER TREES:

For those who with a "do-it-yourself" mindset, we offer smaller trees in #5-gallon and #7-gallon containers that are easy to transport, plant, and maintain at a reasonable cost.

#10-gallon and #15-gallon size trees are also available and are well-established while still being lighter and easier to transport and plant than a ball & burlap tree.

For a complete updated availability, please visit our website or give us a call.

AQUATICS

We offer a large variety of aquatic plants in several sizes for those with water gardens as well as supplies like aquatic pots, soil, fertilizers, pond netting & more!

Goldfish, Koi & Trapdoor Snails are also available to purchase from around the end of May through the end of September. Most fish are raised here in our on-site pond and then are caught for you to enjoy! A large range of colors and sizes are usually available.

HARDSCAPES

Various landscape boulders, decorative stones, colored mulches, weed fabric and more are available for purchase at the garden center. Call or stop in for pricing and availability.

HARD GOODS & PLANTING SUPPLIES

We carry all your planting supply needs from fertilizers, fungicides & insecticides to tree guards, planting mixes, tools, sprayers and more! Stop in or visit our website to see what's currently in-stock. Our staff will be more than happy to help you select the appropriate product for any of your planting needs. Email, or see a nurseryman in-store.

NEED HELP, SUGGESTIONS, OR IDEAS?

Our professional nurserymen can help to make suggestions for plants that will thrive in their future environment. When it comes to plants, the right location can make or break the overall health and survival of a plant. We can help you navigate and choose what works best for you!

Information that is helpful for us to have when making suggestions includes:

- *General measurements of the area to be landscaped
- *Directionality of the area to be landscaped (N, E, S, W)
- *Is the area wet, soggy, very dry, located under black walnuts, powerlines, etc.?
- *Do you have deer and do they like to munch on your shrubbery?
- *Do you have any preferred traits such as foliage, or flower color, growth habit, low maintenance plants, etc.?

CUSTOM STARTER TREES:

For those who with a "do-it-yourself" mindset, we offer smaller trees in #5-gallon and #7-gallon containers that are easy to transport, plant, and maintain at a reasonable cost.

TERMS & CONDITIONS

*For larger, or hard to find material, please call or email for a quote

*Wholesale discounts given to those established in the trade, please ask for details

*Order signature, NET 30 terms for those who have established credit

If you are interested in setting up a credit account, please give us a call or stop in to apply.

*Prices subject to change without notice. All prices are F.O.B.

*Delivery available within a 50 mile radius of W&W Nursery, fees based on location. Deliveries farther than 50 miles can be arranged at the discretion of management.

*Due to sales & growth of plants, all sizes & varieties may not be available. Availability changes daily.

Check out our website for a complete updated availability, or give us a call.

*Additional items may not be listed. Call for specific inventory questions or to place a custom order.

*This list cancels all previous lists.

*For your convenience, we accept Visa, MasterCard and Discover and American Express.

*For custom orders totaling over \$1,000, a 3% convenience fee will be issued if paying via cc.

No additional fees are added if paid for via cash, or check.

*If you need to see something and can't make it into the nursery, please email & we can send photos.

*Orders that have been specially pulled and are then cancelled will result in a 20% restocking fee.

*No, we can't grow it faster, we've tried!

GIFT CARD POLICY

Once activated, gift cards are redeemable for merchandise only at W&W Nursery and Landscaping and have a monetary value determined at the time of purchase. Gift cards cannot be redeemed for cash applied towards wholesale accounts, credit cards, or other electronic pay cards or services.

W&W Nursery and Landscaping is not responsible for lost or stolen gift cards. Gift cards never expire.

Gift Cards can be purchased online via our website, over the phone, or in person at the garden center

NURSERY STOCK WARRANTY POLICY

We warranty our nursery stock to be true under the name of which it is sold. Should any tree/shrub bought at W&W Nursery and Landscaping die within one year of the purchase, we will reimburse 50% of the purchase price towards a replacement plant of your choosing. The reimbursement will be issued as an in-store credit that can be used for one year from original date of purchase provided that:

- The dead plant is returned for inspection at the time a claim for replacement is made. If the plant is too large to return, extensive photos of the plant, area of concern, and root zone will suffice.

This is the only time photographs will be acceptable as proof of plant death.

- Reasonable horticultural practices were used by the customer.

- The original printed cash register receipt, or invoice, accompanies the returned plant.

WARRANTY NOTES & EXCEPTIONS

- No warranty is given on any sale, final sale, discounted items, annuals, perennials, houseplants, herbs, vegetables, fruit trees & fruit shrubs, or trees with a caliper of 4" or larger.

- No warranty on items purchased with a landscaper, or contractor discount

- No additional warranty will be provided for replacement items

- Any plant that is up to 30% dead will not be warrantied. With proper care, the plant should recover.

- If any plant item dies and we also had issues with the same stock at the nursery, a replacement plant of the same species, size, and value will be offered at no cost at the discretion of management and is subject to current availability. If unavailable, the purchase amount can be refunded, or turned into store credit which is decided upon by the customer.

- W&W Nursery is not responsible for any labor costs, delivery fees, or any other costs incurred in planting or removal of any/all materials. We are also not responsible for damage done by animals (girdling), insects, disease, or weather conditions; generally things that we have no control over. We are also not responsible for the death of a plant due to lack of and/or improper watering, human misbehavior, mechanical damage, salt damage, improper planting, or theft of plant material.

NO EXCEPTIONS TO THE ABOVE CONDITIONS WILL BE ALLOWED

STORE RETURN POLICY

An item may be returned for a full refund if:

- The printed cash register receipt accompanies your return
- The return is within 5 days of original purchase date
- The item is still in the pot, healthy, and is in resaleable condition
- The item is not a sale, or final sale item

When returning an item paid for via check, there is a 14-day waiting period. However, an in-store credit or a check sent in the mail for the amount of the refund is available. No cash refunds will be issued unless it is the same date as initial purchase. Otherwise, items paid for in cash will be refunded via check after the 14-day waiting period, or the purchase amount can be credited onto a credit, or debit card.

DELIVERY POLICY

Deliveries can be scheduled Mon-Fri during normal business hours, but are also subject to driver availability. No Saturday deliveries unless it is under special circumstances that have been previously approved by shipping & receiving. NO SUNDAY DELIVERIES.

- Your delivery will arrive on the scheduled day and the driver will call if there is a problem or delay
- We appreciate your patience during our busy season (April-June)
- Please notify us immediately if you have a new driveway or low power lines
- Drivers are not permitted to drive on lawns or unpaved surfaces due to the weight of trucks and materials, so please do not ask. Driver reserves the right to dump where safest
- Customer does not need to be home to accept delivery
- Merchandise is placed in driveway, or on curbside, unless otherwise noted. Marking flags can be given to mark delivery placement
- W&W Nursery and Landscaping is not responsible for any/all damages done to driveways, parking lots, etc., due to the delivery of bulk stone, mulch, topsoil, compost, hard goods or plant stock where the customer has instructed the delivery to be placed
- Any bulk product that has been over-ordered will not be picked up or reimbursed
- Delivery charges are non-refundable on replacement items. If your replacement item needs to be delivered, another delivery charge will be required by the customer
- Any and all claims must be made within 24 hours of delivery and before bulk product, hard goods, or plant materials has been inserted into the landscape
- Per NYS law, W&W Nursery and Landscaping is not allowed to dump any product on streets or any other municipal property. Please do not ask

TO OUR CUSTOMERS

All nursery stock shall meet A.N.L.A. (American Nursery and Landscape Association) standards and is in the best quality we can offer at the time of sale. Acceptance of nursery stock at the time of sale is proof of good health. All nursery stock is inspected by the Department of Agriculture and Markets.

All inventory is used to daily irrigation in our yard and it is of the utmost importance that you, our customer, continue these watering practices for the plants until it has been planted in the ground and has begun to acclimate. W&W Nursery and Landscaping, Inc. strives to do our part in providing good, quality nursery stock and we ask our customers to continue with these practices and do your part to ensure that your living investment continues to thrive.

We care about our customers and have detailed planting instructions available at the time of sale for the benefit of the purchaser during the installation process. If you do not receive one, please ask!

If you have further questions, give us a call or email to speak with one of our nurseryman.

PLANTING INSTRUCTIONS

- 1) For well-drained soils, dig the hole 1.5-2 times as wide and the same depth as the rootball. Fill in the bottom 3" with a mixture of 1/3 topsoil, 1/3 of your soil, and 1/3 of compost. (Rule of Thirds)
 - 2) For poorly-draining soils, plant the tree or shrub higher - generally 1/2 - 2/3 above soil level. In some instances, it may even be higher depending on how well the soil drains. Add gypsum to the bottom of the hole to help break up any clay and turn it into useable soil for the plant. Again, using the rule of thirds for your planting mixture, mound the soil up around the rootball, but do not put material right up against the trunk. If you pile material up along the trunk/crown, you will suffocate your plant. For particularly bad drainage, add a drain channel in the bottom of the hole about 3 feet deep and filled with gravel.
 - 3) If your plant is in a container, remove the rootball from the plastic pot. Try to rough up, or tease the roots loose by moving your hands up and down the root mass. If the root mass is potbound, use a knife or hand pruner to score the roots vertically 3-5 times, then use your hands to loosen the roots up a bit. Don't fear for the plant's health! Believe us when we say you are doing it a big favor as it will encourage new root growth to help your plant become established quicker.
 - 4) Carefully place the rootball into the hole so that the top of the rootball is 1-2" above ground level, unless you have poor-draining soil as mentioned previously in step #2.
 - 5) Backfill 2/3 the depth of the rootball with your blended soil mix created earlier.
- *For balled & burlap trees, cut the rope that wraps around the trunk. Remove only the top of the wire basket, leaving the bottom 2/3 on. **NEVER REMOVE THE WIRE CAGE COMPLETELY!** The plant needs the cage to help keep the soil packed around the roots. The roots will grow through the wire cage with no issues *
- Loosen the burlap from around the trunk and fold it down around the hole. Remember to make sure the rootball is firmly set in the soil before untying the burlap and rope. For potted plants, simply slide them into the hole and backfill.
- 6) Continue to fill around the rootball with your blended soil mix and tamp the soil firmly and continue to add until it is roughly 3 inches from the top of the rootball.
 - 7) Water the plant with a SuperThrive rooting hormone solution. See package for mix rate.
 - 8) Complete filling with the blended soil, leaving the top 3 inches un-tamped. Make sure there is no soil, mulch, rope, etc. next to the trunk as this will rot the bark, welcoming insects and disease. Using topsoil, make a bowl several inches away from the trunk to hold water for future irrigations.
 - 9) Lay mulch 2-3" thick using wood chips, bark mulch, decorative stones, etc. and avoid building mulch up around the base of the plant. If it's built up, the heat produced by the mulch can burn the plant and rot the bark.
 - 10) Guy and stake your trees for the first year after planting
 - 11) In 3-4 weeks, add your fertilizer. There are many types of fertilizers available, but we usually like to use a slow-release granular fertilizer such as Jack's Classicote, or Osmocote. For other options, stop in store or talk to a nurseryman.

TIPS & TRICKS FOR A SUCCESSFUL FIRST YEAR

WATERING

Proper watering of plants after installation is perhaps the most important duty. The amount of water depends on the conditions of your area, but generally for the first year you should water 2-3 times per week if you haven't received at least 1 inch of rain. Most plants should not be soaked or kept soggy; Moist conditions are ample.

Some types of plants are a bit more on the dramatic end of things and will need to be watered fairly frequently throughout its lifespan, or require wetter conditions. For instances such as these, it's usually wise to invest in some soaker hose, or some type of irrigation system if you don't want to drag hoses/watering cans around.

Don't be concerned with a little wilt during the heat of the day, provided your plants are fresh looking again the next morning. It's important to let up on watering as much as possible as frosty mornings approach - this will encourage the new growth to harden off for the coming winter.

Signs of under-watering - the plant will 'flag', or show signs of distress such as drooping foliage or foliage that has turned yellow-brown and is crispy to the touch.

Signs of over-watering - the plant will show signs of distress such as foliage that's yellow-brown and has a leathery feel to it, molds growing on parts of the foliage, soggy soil.

FERTILIZING

Feeding your plants is something many people will overlook, but is vital to continued plant health. Plants vary from one type to another and require different types, or formulas of fertilizer. Generally, we use a rooting hormone at the time of installation to help prevent transplant shock and become established quicker. You can also use it as a general fertilizer for things that are very light feeders like lilac shrubs, or sedum.

The least care-intensive, but very effective method of fertilization is the use of a time-release granular fertilizer such as Jack's Classicote, or Osmocote that is applied 1-2 times per year. These types of fertilizers release nutrients over a period of 3-4 months.

PEST AND DISEASE CONTROL

The best way to ward off the onset of pests and diseases is to ensure you keep your plant healthy with good watering and fertilizing practices. Applying horticultural oil (AKA dormant oil) in the early spring suffocates eggs that can turn into troublesome pests.

For insects, there is a broad range of insecticides, or organic oils etc., to control populations. Some are systemic and are taken up through the roots and into the plant to protect it from the inside-out, and some are used as a topical, or contact application. We can help you choose what's best for you!

For diseases, there is also a broad range of fungicides, bactericides, algicides, etc., to prevent or combat different issues. We can help you choose what's best for your situation!

If you have any questions, or concerns about your plants, we suggest you call, or email, to make an appointment with a nurseryman who can help you with solutions. You can also email us with photos and descriptions of plant issues and we will be able to help that way as well.

NURSERY SALES YARD HOURS

April	Sunday	CLOSED
	Mon-Sat	9am-6pm
May & June	Sunday	10am-4pm
	Mon-Sat	9am-6pm
July-October	Sunday	CLOSED
	Monday	CLOSED
	Tues-Sat	9am-5pm
Winter Hours (November-March)	By appointment only	

Regular season - Open at 8am for wholesalers only

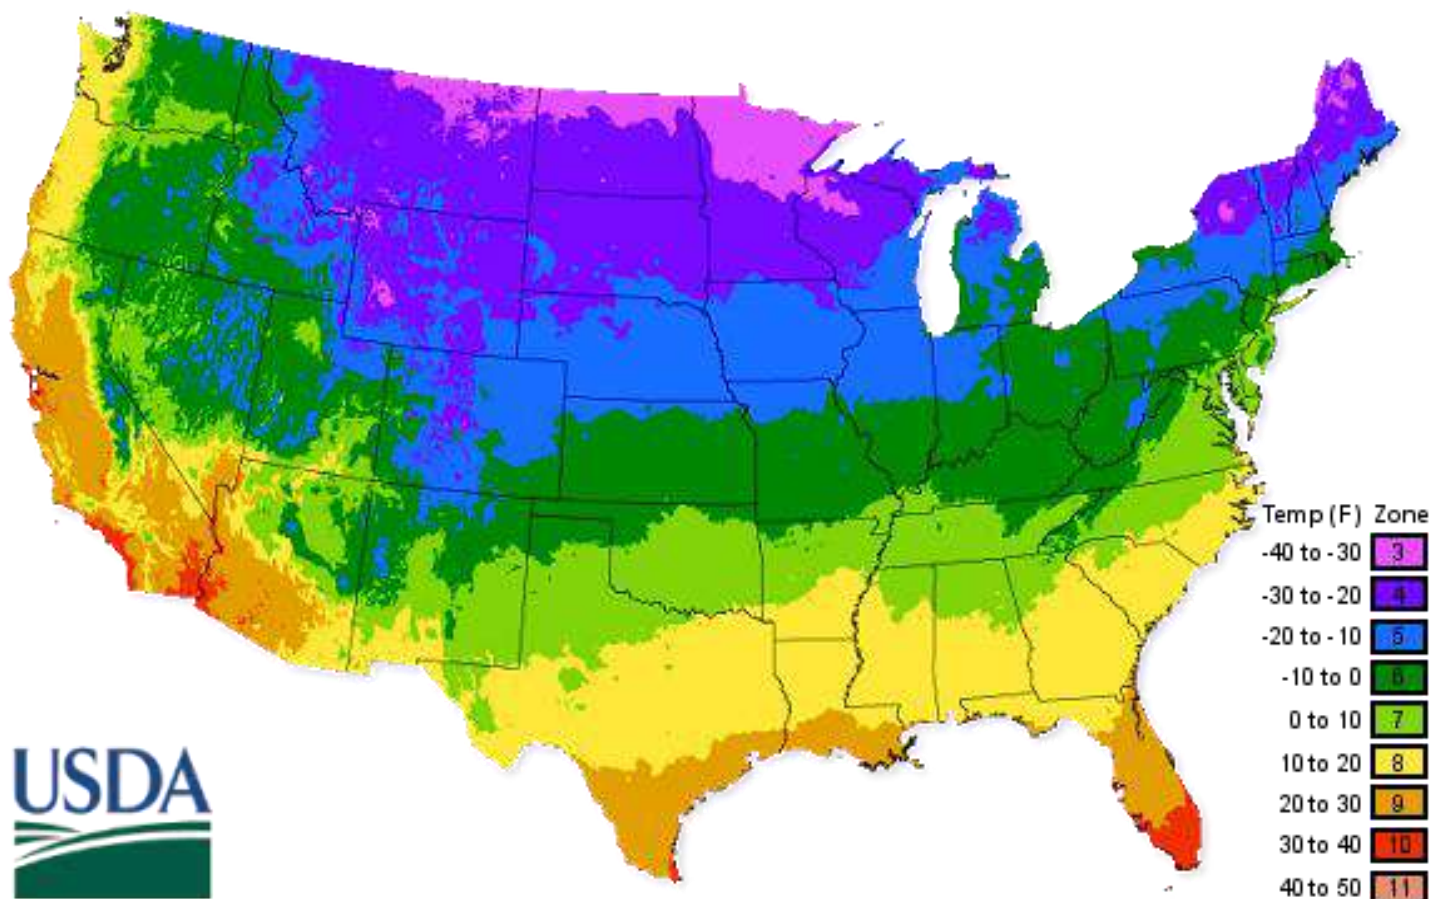

About Us:

Since 1988, our crews have provided quality professional landscape services using nurserymen's growing and planting methods to ensure your investment keeps growing.

W&W Nursery and Landscaping is a proud grower of nursery stock to include hardy shade and ornamental trees, shrubs, evergreens, perennials, vegetables & more! We currently have 35 acres in production with the intent to expand our growing operations to meet wholesale and retail needs.

Our garden center and sales yard is located at the nursery and is open to the public as well as those established in the nursery and landscape trade. We strive to supply a large variety of landscape needs with a commitment to high quality nursery stock. Family owned and operated!

Know Your Zone!

This is a nationwide map that shows what zone each part of the country is considered. Knowing what zone you are in helps you choose and purchase plants that will thrive in your area.

For the most part we only sell plants that are zone hardy, so you don't have to worry!

If you plant something that is meant for a warmer zone, it will die and you will have a nice bundle of crispy sticks in the spring - which is never fun! Big Box stores tend to carry plants that don't survive in the zones they are sold in, but we make sure your newly adopted plants will live to see another spring!
